NYSDEC	New York State Department of Environmental Conservation
PEJA	Potential Environmental Justice Area
PPP	Public Participation Plan
SIP	State Implementation Plan
tpy	Tons per year
VOCs	Volatile Organic Compounds

I. INTRODUCTION AND OBJECTIVE

This Public Participation Plan (PPP) has been prepared by Buffalo Shredding & Recovery, LLC (hereinafter referred to as “applicant”) to fulfill and comply with the requirements of New York State Department of Environmental Conservation **Commissioner Policy 29, Environmental Justice and Permitting (CP-29) and 6 NYCRR Part 621.3(a)(3)** for their proposed permit change from an Air Facility Registration (AFR) to an Air State Facility (ASF) permit, that requires a full ASF permit application and which has been determined by NYSDEC to potentially impact one or more potential environmental justice area (PEJA) and/or Disadvantaged Community (DAC) (See Figure 1).

This PPP has been developed in accordance with the procedures established in CP-29 Section V.D and it aims to help ensure meaningful and effective public participation throughout the NYSDEC environmental permit review process. Public participation in the NYSDEC environmental permit review process means a program of activities that provides opportunities for stakeholders to be informed about and involved during the review of a proposed action.

The objective of this PPP is to outline and describe the program of activities that the applicant will implement to actively seek and enhance public participation during the application review process.

II. PROJECT DESCRIPTION AND PROPOSED ACTION

Project Overview

The applicant proposes to apply for an ASF permit for the facility located at 3175 Lake Shore Road, Blasdell, NY 14219. The application is being submitted in response to the Administrative Compliance Order of Consent U.S. EPA Docket No. CAA-02-2024-1211 issued by the United States Environmental Protection Agency (USEPA) on June 8, 2023, and signed on January 22, 2025. The application follows the limitations and conditions specified in the Consent Order, to limit the facility's potential to emit VOCs to less than 50 tons per year. To implement the proposed project, the applicant has submitted an application to the New York State Department of Environmental Conservation (NYSDEC) for an ASF permit to replace their existing AFR.

Nature of Proposed Project/Action and Purpose

The Buffalo Shredding & Recovery facility processes and separates large scrap metal (junk cars, large appliances and other materials) for recovery and recycling of both ferrous and non-ferrous metals for sale to their customers. The primary operations at the facility consist of an enclosed hammermill driven by an electric motor. Except for the inlet for raw material feed and outlets for processed material, the hammermill is fully enclosed. The hammermill is equipped with a water spray injection system that directs water onto the material inside the shredder. This system, combined with cyclone separators, comprises the dust mitigation controls on the shredder. Emissions resulting from the shredding process are fugitive in nature and consist of particulate matter and steam generated from the heating of the injection water during the shredding process.

The output from the shredder consists of a mixed metal stream (ferrous and non-ferrous) that is subsequently processed/separated further by metal composition and a separate waste stream or "shredder fluff" that consists of the non-metallic waste (plastics, foam, etc.) that is segregated for disposal. No changes to the facility are planned as part of this ASF permit application.

The facility currently operates under an AFR (DEC ID 9-1448-00419) issued on 11/20/2017. The application is being submitted in response to the Administrative Compliance Order of Consent U.S. EPA Docket No. CAA-02-2024-1211 issued by the United States Environmental Protection Agency (USEPA) on June 8, 2023, and signed on January 22, 2025. The Administrative Consent Order was the result of an EPA issued Notice of Violation (NOV) for potentially violating the New York State Implementation Plan (SIP) by operating the facility with a potential to emit (PTE) in excess of 50 tons per year (tpy) of volatile organic compounds (VOC) without obtaining and maintaining the required permits or federally enforceable permit condition limiting emissions of VOCs. Figure 2 below provides a site layout.

Potential Impacts

It is not anticipated that the required permit change will have an impact on the surrounding community. The applicant has operated the facility since December 2011 with slight modifications in February 2018 and a proposed pre-shredder as part of this permit change. There are no other structural or operational changes to the facility planned as part of this required permit change. The abovementioned consent order issued by the EPA states operational limits and emission limits that will be incorporated into the ASF permit. Some of the limits are described below.

- VOC emissions will be limited to less than 50 tpy
- Emissions will be calculated using a VOC emission factor of 0.39 pounds of VOC per gross ton of shredder feed.
- The shredder will be limited to 247,500 gross tpy of shredder feed.

These limits and the more detailed ASF permit will serve to better regulate the existing facility operations.

III. STAKEHOLDER IDENTIFICATION & CONTACT LIST

A contact list consisting of the names, addresses, phone numbers, or email addresses of stakeholders to the proposed action is provided in Appendix A. The contact list includes individuals and organizations with a direct stake in the proposed action and people and individuals and organizations that have expressed interest in the proposed project or similar projects affecting the same neighborhood or community.

The Applicant utilized publicly available information (ArcGIS) to help identify stakeholders and develop an initial contact list.

The current contact list will be updated as necessary in consultation with NYSDEC by identifying additional stakeholders from the following categories: local government and elected officials; business owners, residents, and occupants; local civic, community, environmental and religious organizations; local news media; administrator/operator of any school or day care that live, work and/or represent a neighborhood or community that are in a PEJA and/or DAC within a 0.5 mile radius of the project area.

The Applicant will utilize this contact list to communicate and disseminate information about the proposed project and permit application review process to the affected community and stakeholders. At minimum, this includes distribution of the written information and outreach materials described in Section V to inform the community about upcoming public meetings and opportunities for public participation. Additional measures to promote efficient notification to the affected community and stakeholders include:

- Mailing notices labeled “to current residents” to assure resident occupants receive notices in addition to building owners.
- Providing instructions to building owners to distribute notices to tenants, and indicating they may request additional materials, such as additional notices for distribution.
- Meeting notices and fact sheets will be posted in public areas within the vicinity of the facility (e.g., schools, churches, healthcare centers) as well as bulletin boards located in the lobbies of residential complex buildings where accessible.

The contact list will be reviewed periodically and updated as appropriate throughout the permit application review process. The applicant will update the contact list with any new stakeholders identified during the public meeting or execution of other PPP components. In addition, individuals and organizations will be added to the contact list upon request. Such requests should be submitted to the project liaison identified in Section IV. Other additions to the contact list may be made at the discretion of the applicant or, at the request of the NYSDEC project manager, in consultation with other NYSDEC staff, as appropriate.

IV. PROJECT LIAISON

Representatives from the project team will be available during business hours at:

Glenda Wehrli – Director of Environmental Compliance & Employee Safety

(412) 771-7000 (ext. 5033)

gwehrli@metalico.com

3175 Lake Shore Road

Blasdell, NY 14219

Or

Thomas Samarco, Principal, Ramboll (Project Consultant)

(412) 443-2539

tsamarco@ramboll.com

Impacted residents and interested stakeholders can contact the project liaisons listed above to provide input to the project team, discuss issues or concerns and/or to ask questions or request information. The project liaisons shall respond in a timely manner and in the manner appropriate to the questions or information requests received. The project liaison will be responsible for tracking and documenting public input, inquiries, questions, and information requests received, along with responses provided.

V. PUBLIC OUTREACH ACTIVITIES

The applicant will utilize a range of engagement strategies and conduct various public outreach activities to facilitate participation, involvement, and direct communication with the affected community during the permit application review process. The applicant will implement the public outreach activities outlined below upon finalization and approval of this PPP by NYSDEC.

In compliance with the requirements of CP-29, the applicant will hold public information meeting to keep the public informed about the project and the environmental permit review process. At minimum, the applicant will prepare, distribute and post written information and materials, including a meeting notice and fact sheet, to encourage dialogue and solicit input from interested stakeholders during the permit application review process. All public outreach materials and information will be prepared and presented in an easy-to-read, understandable format, using plain language free of legal terminology, and geared towards a non-technical audience.

The public meeting notice and fact sheet will be made available and disseminated in English. In addition, the public can contact the project liaisons regarding the availability of language assistance and to request that the notice and fact sheet are translated into another language for comprehension by non-English speaking or limited proficiency stakeholders.

Public Meeting(s)

At the discretion of NYSDEC and, depending on the scale and nature of a project, one or more virtual public meeting(s) must be conducted to satisfy the intent of CP-29.

The applicant is proposing one meeting to inform the public about the project.

Public Meeting

The applicant will conduct a public meeting in hybrid format (in-person and virtual access options) on November 12, 2025, at 6pm.

Meeting Objectives:

- Inform the public about the proposed project and permit application review status (*i.e.*, the permit application was recently submitted to NYSDEC for review)
- Inform attendees that CP-29 requires the applicant to engage and involve the public throughout the permitting process; state that the proposed project may change depending on regulatory requirements of NYSDEC, along with public input received as a result of public participation and outreach activities conducted in the course of implementation of the Public Participation Plan.
- Provide the opportunity for stakeholders to ask questions and express concerns about the project and identify how to obtain information or answers to questions after the meeting has concluded.
- Inform attendees how they may submit written comments on the permit application to the NYSDEC during the public comment period and, if available, identify any applicable deadlines.

Meeting Format:

- Hybrid meeting with both an in-person town-hall style meeting that is simultaneously conducted in a virtual format (via GoTo Webinar, Zoom, or other online meeting format).
- Introductory presentation by the Applicant, followed by an opportunity for the public to comment and ask questions.

Date:

- November 12, 2025

Location:

- Woodlawn Fire Department
- 3281 Lake Shore Road
- Blasdell, NY 14219
- Online

Necessary Meeting Discussion Points and Requirements

The meeting will be facilitated by the applicant and/or representatives from their project team (project personnel) using online meeting software. During the meeting, the applicant

and/or representatives from their project team will present a brief overview of the project, including any relevant background information, details on the permitting action, schedule, and community impacts. The second part of the meeting will include a question-and-answer-portion where the floor will be open for attendees to ask questions, make remarks, and/or express concerns. In addition, the following discussion points will be addressed:

- Provide an update on the permit application review process and identify outstanding application requirements and future milestones in the application review process.
- Make it clear that the meeting is being held prior to NYSDEC's permitting decision for the project.
- Identify the location of the physical and online document repository and provide directions on how attendees may obtain and review materials relevant to the application, documents related to the meeting and other public participation plan components.
- Identify and provide contact information for the project liaisons and announce procedures for how attendees may obtain answers to questions after the meeting has concluded and interested stakeholders can submit questions, express concerns, or request additional information by telephone, email, and in writing.
- Announce any future outreach, opportunities for public participation, and /or required follow-up with attendees including, but not limited to: additional meetings and future mailings, including, but not limited to the Notice of Complete Application.

Attendance will be recorded during the meeting and virtual attendance will be recorded by downloading the participant list from the meeting software used during the meeting. The applicant will track the number of attendees for the meeting held during implementation of this PPP and, where feasible and applicable, identify any affiliation of participants and interests represented at the meeting. In addition, the applicant will be responsible for documenting meeting notes or minutes, along with a record of comments and questions raised in the meeting and respective responses and answers provided. Attendees not identified on the contact list will have the option to be added in the event of future meetings or information sharing.

Virtual Public Meeting Notice Preparation and Distribution

Information regarding the details of the public meeting and how to participate via computer and/or telephone is contained in the reader-friendly meeting notice(s) shown in Appendix B. Through this notice, the public will be invited and encouraged to attend the public meeting scheduled for November 12, 2025.

Once the PPP has been approved by NYSDEC the public meeting notice will be posted and available in the online document repository described in Section VI of this document. At least two weeks in advance of the public meeting, the notice will be published in the Buffalo News which is a weekly newspaper printed, published, and circulated weekly in Erie County, Town of Blasdell. In addition, the public meeting notice will be sent via mail to local residents and emailed to community stakeholders identified in the contact list in

Appendix A at least two weeks prior to the public virtual meeting. Mailings will be supplemented with additional notification mechanisms as bulleted in Section III above.

Fact Sheet Preparation and Distribution

Factual information on the proposed project, including an overview, purpose statement, and potential impacts, is outlined in the reader-friendly fact sheet shown in Appendix C. In addition, the fact sheet outlines how interested stakeholders can: participate in the permit application review process; access the online document repository to review relevant application materials prior to the public meeting; and contact the project team to obtain additional information.

Once the PPP has been approved by NYSDEC the fact sheet will be posted and available in the online document repository described in Section VI of this document. No later than 2 weeks prior to the public meeting, the applicant will distribute the fact sheet to provide stakeholders with relevant background on the proposed project and facilitate meaningful participation during the meeting. The fact sheet will be distributed together with the public meeting notice as described above and utilizing the notification methods bulleted in Section III. The fact sheet(s) will also be posted within the vicinity of the project facility (e.g., schools, churches, healthcare centers) as well as bulletin boards located in the lobbies of residential complex buildings where accessible.

Distribution of Notice of Complete Application

Once NYSDEC determines the application for the proposed action/project is complete and provides the Notice of Complete Application (NOCA) to the applicant, the applicant will distribute the NOCA and instructions as to how to view a copy of the draft permit, if applicable, to the meeting attendees and any identified interested parties, to provide notification regarding the start of the NYSDEC public comment period and to announce the deadline for submission of written comments to NYSDEC.

VI. DOCUMENT REPOSITORY

An online document repository will be established for the community and interested stakeholders to access and review information about the project. The online repository available at <https://buffaloshreddingpermit.com> will provide information and documents relating to the project and permit application.

There will also be a repository available for in-person review of documents at the shredder office located at the facility weekdays between the hours of 9:00am – 5:00pm.

The repository will be updated throughout the application process with project-related information and written materials (i.e., application forms and supporting materials, draft

permit, fact sheet, statement of basis (where applicable), the Notice of Complete Application provided by the NYSDEC, etc.).

VII. SUBMISSIONS

Final Summary Report and Written Certification

Upon completion of the enhanced public participation plan, the applicant will submit written certification to NYSDEC to certify that it has fully executed and complied with the approved PPP. The certification shall be signed by the applicant, or the applicant's agent, and submitted to NYSDEC prior to a final decision on the application.

As part of the certification, the applicant shall submit a final summary report documenting the implementation of this PPP. The report will summarize the activities that occurred in accordance with the PPP and will identify any substantive concerns raised by stakeholders during the public meeting, or, at any time throughout the permitting process and detail the applicant's response(s) to any such concerns or questions. The applicant will include, or append, any documentation that supports the final summary report, such as: the meeting sign-in sheet(s), record of attendees/participants, meeting presentation, notes or minutes, summary of questions and answers, and copy of newspaper notice or other proof of publication. In addition, the report will identify any changes or modifications to the proposed project that were made or considered by the applicant to address or reduce concerns surrounding the permit application.

The final summary report and written certification will become part of the application record and will be posted to the document repository so that it is readily available to the public.

APPENDIX B
Virtual Public Meeting Notice
(English)

Buffalo Shredding and Recovery, LLC Permit Change

PUBLIC MEETING

YOU ARE INVITED!

Join us for a public meeting to learn about this project.

Buffalo Shredding and Recovery LLC has submitted an application to the New York State Department of Environmental Conservation (NYSDEC) for an Air State Facility (ASF) permit for the required Buffalo Shredding Permit Change. A Public Participation Plan has been developed in accordance with NYSDEC Commissioner Policy 29, Environmental Justice and Permitting (CP-29). The purpose of this meeting is to inform the public about the project and to involve the community during the ASF permit application review process.

Public Meeting Agenda:

- Project Overview
- Background
- Scope of Work
- Project Schedules
- Community Impacts
- Question & Answers

Your attendance is important!

Project personnel will be available to answer questions from the community. For additional information on the proposed project:

APPENDIX C

Fact Sheet

(English)

Buffalo Shredding Permit Change

Project Fact Sheet

- **Project:** Buffalo Shredding and Recovery Permit Change
- **Applicant:** Buffalo Shredding and Recovery, LLC
- **Facility:** Buffalo Shredding – Blasdell Facility - 3175 Lake Shore Road, Blasdell, New York 14219
- **NYSDEC Application Number:** 9-1448-00419/00001 A Public Participation Plan (PPP) has been developed in accordance with NYSDEC Commissioner Policy 29, Environmental Justice and Permitting (CP-29)

What is the Proposed Project?

The applicant proposes to apply for an Air State Facility (ASF) permit for the facility. The application is being submitted in response to the Administrative Compliance Order of Consent U.S. EPA Docket No. CAA-02-2024-1211 issued by the United States Environmental Protection Agency (USEPA) on June 8, 2023, and signed on January 22, 2025. The application follows the limitations and conditions, specified in the Consent Order, to limit the facility's potential to emit VOCs to less than 50 tons per year. To implement the proposed project, the applicant has submitted an application to the New York State Department of Environmental Conservation (NYSDEC) for an ASF permit.

Why does Buffalo Shredding need to change their permit?

The Buffalo Shredding & Recovery facility is a scrap metal processing facility that includes a shredder used to process automobile and scrap metal materials. The secondary process is the non-ferrous downstream recovery system, which separates additional metal content from byproducts generated during shredding.

The facility currently operates under an Air Facility Registration (AFR) DEC ID 9-1448-00419 issued on 11/20/2017. The renewal application is being submitted in response to the Administrative Compliance Order of Consent U.S. EPA Docket No. CAA-02-2024-1211 issued by the United States Environmental Protection Agency (USEPA) on June 8, 2023, and signed on January 22, 2025. No changes to the facility are planned as part of this permit application.

The purpose of this fact sheet is to inform the public about the Project and to involve the community during the NYSDEC permit application review process.

How might the project affect the surrounding community?

It is not anticipated that the permit change will have an impact on the surrounding community. The Facility has operated since December 2011 with slight modifications in February 2018 and a proposed pre-shredder as part of this permit change. There are no other structural or operational changes to the facility planned as part of this required permit change. The abovementioned consent order issued by the EPA states operational limits and emission limits that will be incorporated into the ASF permit. Some of the limits are described below.

- VOC emissions will be limited to less than 50 tons per year
- Emissions will be calculated using a VOC emission factor of 0.39 pounds of VOC per gross ton of shredder feed.
- The shredder will be limited to 247,500 gross tons per year of shredder feed.

These limits and the more detailed ASF permit will serve to better regulate the existing facility operations.

How can I participate in the permit review process?

- Attend the upcoming virtual and in-person public meeting scheduled for November 12, 2025, at 6:00 pm to learn about the project, ask questions and/or express concerns about the project and identify how to obtain additional information or answers to questions after the meeting has concluded.
- Ask questions, express concerns, provide input or submit comments in writing, by phone or email to the project contact person identified below.

Where can I get more information about the proposed project?

- Visit the online document repository to obtain application materials, relevant documents, and information about the project: <https://buffaloshreddingpermit.com>
- Visit the in-person document repository at shredder office located at the facility between the hours of 9:00am and 5:00pm
- For information on the project, instructions on how to attend the upcoming virtual public meeting, or to find out about the status of the permit application and public comment period contact the following project liaisons at:
